

Foundation "Project My Line of Thought"

## **ECO-PROGRAM ARTISTS IN RESIDENCE**

### **FOUNDATION "PROJECT MY LINE OF THOUGHT"**

The Eco-Program Artists in Residence is a program in which artists participate by offering art workshops to children and adults with any type of special conditions or no condition at all. It promotes the development of new ideas and art teaching methods for the intellectual growth of its participants.

The program offers participating artists an orientation for their resume organization and display, how to create a professional artistic portfolio and how to advertise their work. THE FOUNDATION provides a list of the most important galleries in our country and will help the artists to communicate with them.\* Also, their work will be advertised between the most important collectors of Puerto Rico.

The Foundation will establish links with museums so that the participating artists could offer conferences about their works of art.\* We will also arrange payments for activities like the one mentioned before.

**\*Everything depends on availability. the Foundation is not responsible of any agreement or disagreement the artist will have with a gallery.**

The studios will be open 24 hours a day. Studios are equipped with the necessary instruments depending on the chosen Fine Art:

Painting and Drawing: Light, fans, drawing table, easel and stool.

Creative Writing and Photography: Desk, lamp, table and chair.

### **Materials and equipment**

Accepted artists and writers need to bring the required computer for their work.

The Eco-Program does not have an art store; artists must bring necessary tools or we will provide transportation to access the materials. Trips will be realized once a week.

### **Rooms**

The Eco-Program possesses four private rooms with illumination and equipment. Bathrooms are located outside the rooms and have everything needed for hygiene.
